

# Untangling tech for you

## To whom it may concern

21 December 2023

Regarding Umbraco's Cloud Portal, Backoffice and Frontend, following the verification test SolutionLab performed on November 22<sup>nd</sup> -23<sup>rd</sup>, it was determined that the recent remedial program has been successful in addressing the majority of the issues identified in the original test apart from one issue of low risk and one of informational nature. The result confirms that Umbraco has managed to further strengthen their already good security posture.

Regarding the Trial flow test part, SolutionLab performed a verification test on December 18<sup>th</sup> and has determined that Umbraco has successfully implemented our suggested mitigations and addressed two of the issues identified in the original test. SolutionLab recommend that Umbraco applies the remaining mitigations as well to ensure the Trial Flow's security posture is additionally strengthened.

Sincerely yours,

Zoja Antucevic, CEO
